
The first workbook in the series, designed for young beginners, is a beautifully illustrated resource that will help children to enjoy maths. It has been created by Deepthi Publications who are known for their quality mathematics titles. This book introduces factors and multiples, simple addition and subtraction, parts of 10 to 20, counting money in pounds sterling (£), time on the clock and telling the time with words fifty-five minutes past eleven o'clock. Each page has a fun puzzle to solve at the end which links back to an early concept or skill being learned.

The second edition includes revised exercises following feedback from teachers who have used this resource in their classroom. It also introduces the concept of rounding numbers to the nearest 5 or 10. Along with counting money in pounds, pounds and pence are introduced. The book includes fun puzzles with a link to an early concept or skill being taught.

This book reinforces counting to 20, simple addition and subtraction, double-digits up to 100, money in pounds sterling (£), time on the clock and telling the time with words ten minutes past twelve o'clock. Each page has fun puzzles at the end that link back to an early concept or skill being taught.

The third edition introduces two new activities – singing five fours and nursery rhymes – both of which are linked back to an early concept or skill being taught. The book reinforces counting to 20, simple addition and subtraction, double-digits up to 100, money in pounds sterling (£), time on the clock and telling the time with words ten minutes past twelve o'clock.

The fourth edition introduces two new activities – singing five fours and nursery rhymes – both of which are linked back to an early concept or skill being taught. The book reinforces counting to 20, simple addition and subtraction, double-digits up to 100, money in pounds sterling (£), time on the clock and telling the time with words ten minutes past twelve o'clock.

The fifth edition introduces two new activities – singing five fours and nursery rhymes – both of which are linked back to an early concept or skill being taught. The book reinforces counting to 20, simple addition and subtraction, double-digits up to 100, money in pounds sterling (£), time on the clock and telling the time with words ten minutes past twelve o'clock.

The sixth edition introduces two new activities – singing five fours and nursery rhymes – both of which are linked back to an early concept or skill being taught. The book reinforces counting to 20, simple addition and subtraction, double-digits up to 100, money in pounds sterling (£), time on the clock and telling the time with words ten minutes past twelve o'clock.

The seventh edition is a revised edition of the edition published in 2008 including new revision questions and activities designed to reinforce different skill areas along with the pressure of an exam. The book is especially useful for those revising for exams or those that find working through long numbers stressful.

The eighth edition is a revised and updated version of the sixth edition published in 2010 including new revision questions and activities designed to reinforce different skill areas along with the pressure of an exam.
